This is a ground floor plan of the Knights Centre of Excellence by Wests Group. The plan includes various sections such as the Multipurpose Court, Professional Training Facilities, Stage 1 and Stage 2. The plan details the dimensions and areas of different rooms and facilities, such as the Gym (288 m²), Theatre (98 m²), Wet Recovery (177 m²), and Storage (3 m²). The plan also includes access points, WC, and other functional areas. The scale of the plan is 1:250, and the drawing is prepared by EJE Architecture. The project is located at District Park, Broadmeadow, NSW 2292.

FEATURE PLANTINGS OF Acer 'JEFERSRED' (MAPLE) TO PROVIDE SOLAR ACCESS TO COMMUNAL SPACES AND SEASONAL COLOUR

FEATURE TREE PLANTING OF Lophostemon confertus (BRUSH BOX) TO PROVIDE YEAR ROUND GREENING TO THE SITE AND RELATE TO EXISTING STREET TREE PLANTINGS IN SURROUNDING AREA

CAR PARK AND OUTDOOR FACILITIES TO ARCHITECT’S DETAIL

SELECTED NONSLIP PAVEMENT TREATMENT TO EXTERNAL AREAS

FEATURE PLANTINGS OF Zelkova serrata ‘Green Vase’ (JAPANESE ELm) TO PROVIDE SEASONAL INTEREST AND SUMMER SHADE TO THE AREA

BIKE RACKS AS SHOWN. EXTERNAL PATHWAYS, STAIRS AND HANDRAILS TO ARCHITECT’S DETAIL

CARRIAGE TRUCK PICKUP POINT. DETAILED DESIGN TO BE PROVIDED AS PART OF THE S138 APPLICATION
1. Acer x freemanii ‘Jeffersred’
2. Lophostemon confertus
3. Zelkova serrata ‘Green Vase’
4. Senecio serpens
5. Zamia furfuracea

6. Lomandra tanika
7. Westringia fruticosa
8. Nandina domestica ‘Gulf Stream’
9. Dianella caerulea
10. Tonka

Planting Palette:

1. Acer x freemanii ‘Jeffersred’ - Autumn Blaze Maple
2. Lophostemon confertus - Brush Box
3. Zelkova serrata ‘Green Vase’ - Green Vase
4. Senecio serpens - Blue Chalksticks
5. Zamia furfuracea - Cardboard Palm
6. Lomandra tanika - Tanika
7. Westringia fruticosa - Coastal Rosemary
8. Nandina domestica ‘Gulf Stream’ - Sacred Bamboo
9. Dianella caerulea - Blue Flax Lily

In the event of any inconsistency between conditions of this development consent and the plans/supporting documents referred to above, the conditions of this development consent prevail.
2. Each stage of the development is to be undertaken in the specific order given below:

Stage 1: Southern section of proposed building. 34 space, 28 space and 68 space car parks and separate amenities building.

Stage 2: Northern section of proposed building.

2A. Development Consent 2014/1285 for the “Extension of emergency service facility and associated site works”, to the extent it applies to Lot 3284 DP 1049501, is modified so that activities to be carried within the Helicopter Operations Area identified on the plans referred to in condition 1 of this consent are consistent with the development otherwise authorised by this consent.

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF A CONSTRUCTION CERTIFICATE

3. A total monetary contribution of $184,536.00 is to be paid to the City of Newcastle, pursuant to Section 7.12 of the Environmental Planning and Assessment Act 1979, such contribution to be payable prior to the issue of a Construction Certificate in respect of the development.

Note:
   a) This condition is imposed in accordance with the provisions of the City of Newcastle’s Section 7.12 Newcastle Local Infrastructure Contributions Plan 2019.
   b) The City of Newcastle’s Section 7.12 Newcastle Local Infrastructure Contributions Plan 2019 permits deferred or periodic payment of levies in certain circumstances. A formal modification of this condition will be required to enter into a deferred or periodic payment arrangement.
   c) The amount of contribution payable under this condition has been calculated on the basis of the current rate as at the date of consent and is based on the most recent quarterly Consumer Price Index (CPI) release made available by the Australian Bureau of Statistics (ABS). The CPI index rate is expected to rise at regular intervals and therefore the actual contribution payable is indexed and recalculated at the CPI rate applicable on the day of payment.

CPI quarterly figures are released by the ABS on a date after the indexation quarter and, as a guide, these approximate dates are as follows:

<table>
<thead>
<tr>
<th>Indexation quarters</th>
<th>Approx release date</th>
</tr>
</thead>
<tbody>
<tr>
<td>September</td>
<td>Late October</td>
</tr>
<tr>
<td>December</td>
<td>Late January</td>
</tr>
<tr>
<td>March</td>
<td>Late April</td>
</tr>
<tr>
<td>June</td>
<td>Late July</td>
</tr>
</tbody>
</table>

Any party intending to act on this consent should contact City of Newcastle’s Customer Enquiry Centre for determination of the indexed amount of contribution on the date of payment.

4. On-site parking accommodation is to be provided for a minimum of 130 vehicles (including 6 disability accessible spaces) and meet the minimum parking layout standards indicated in Element 7.03 ‘Traffic, Parking and Access’ of Council’s adopted Newcastle Development Control Plan 2012. Details are to be included in documentation for a Construction Certificate application. No car spaces within the car park immediately to the south of the CoE building or the western car park shall be marked, signposted or otherwise identified as being for the sole use of staff only.

5. The car parking and vehicular access is to be designed to comply with AS/NZS
6. All proposed driveways, parking bays, loading bays and vehicular turning areas are to be constructed with a basecourse of adequate depth to suit design traffic, being sealed with either bitumen seal, asphaltic concrete, concrete or interlocking pavers and being properly maintained. Full details are to be included in documentation for a Construction Certificate application.

7. A concrete pedestrian pathway is to be provided within the site, along the full Perth Road and Bavin Road frontages, linking to the pedestrian refuge required under Condition 16(d) of this consent. Full details are to be included in documentation for a Construction Certificate application.

8. All stormwater runoff from the development being managed in accordance with the requirements of Element 7.06 ‘Stormwater’ of Newcastle Development Control Plan 2012, the associated Technical Manual and the latest issue of AS 3500.3. The 27 and 42 spaced car parking areas must be provided with either retention systems with sand filter or detention with runoff from the detention being treated via landscaped water sensitive areas prior to discharge. The minimum retention/detention storage must be calculated based on 25m³ per 1,000m² and a MUSIC modelling must be done to demonstrate that the design has achieved the water quantity and quality targets set in Element 7.06 ‘Stormwater’ of Newcastle Development Control Plan 2012. Full details are to be included in documentation for any Construction Certificate application.

9. Roof water from the Centre of Excellence (COE) building is to be directed to the proposed 6 x 22,700 Litre rainwater tanks and be reticulated to new toilet cisterns and cold-water washing machine taps in the building and landscaped areas. A separate rainwater tank must be provided (which can be either underground or above ground) and the discharge from the 6 x 22,700L tanks and any additional roof and hardstand areas should be connected to this tank. The separate rainwater tank should be designed by an appropriately qualified hydraulic consultant for the purpose of irrigating of the Knights Training playing Field. Appropriate form of stormwater treatment should be provided to mitigate any health issues relating to reuse of the stormwater for irrigation of the Training Field. The water tanks, Irrigation facilities and the associated infrastructure are to be installed in accordance with the relevant Codes, Australian and Industry. Full details are to be included in documentation for any Construction Certificate application.

10. Overflows from the rainwater tanks and any additional discharge controls (if required) are to be directed to Hunter Water drainage system by means of an interallotment drainage line or underground pipe directly to the Hunter Water Channel. Approval from Hunter Water is to be obtained and full details are to be provided with any Construction Certificate application.

11. The floor level of the proposed COE building is to be not below RL 8.1m Australian Height Datum and being indicated on plans for a Construction Certificate application. The finished floor levels are to be certified by a registered Surveyor prior to the placement of the floor material and a copy of the Surveyor’s Certificate is to be forwarded to the Principal Certifying Authority.

12. A flood emergency response plan is to be prepared, by independent consulting engineers experienced in flood management, and put in place by the applicant prior to occupation of the building. The plan is to include an education and awareness component for the workforce; to detail evacuation procedures; to interface with the local flood warning system; to include the local State Emergency Services plan; and to include provisions for any third parties likely to be involved.
The flood emergency response plan is to describe the following components:

a) likely flood behaviour
b) flood warning systems
c) education awareness program
d) evacuation and evasion procedures
e) evacuation routes and flood refuges and
f) flood preparedness and awareness procedures for residents and visitors

Considerations should include the full range of flood risks, the proposed use of the site, site access constraints and local area evacuation routes to high ground. As much as possible, the plan is to be aimed at self-directed evacuation or evasion to minimise the draw on limited State Emergency Services resources. The plan is to be updated and maintained by the occupiers. Full details are to be included in documentation for a Construction Certificate application.

13. All proposed planting and landscape elements indicated on the submitted landscape concept plan or otherwise required under the conditions of this consent are required to be detailed on a landscape plan and specification. The plan and specifications is to be prepared in accordance with the provisions of Newcastle Development Control Plan 2012 and is to include details of the following:

a) cross sections through the site where appropriate
b) proposed contours or spot levels
c) botanical names
d) quantities and container size of all proposed trees
e) shrubs and ground cover
f) details of proposed soil preparation
g) mulching and staking
h) treatment of external surfaces and retaining walls where proposed
i) drainage, location of taps and
j) appropriate maintenance periods.

The plan is to be prepared by a qualified landscape designer and be included in documentation for a Construction Certificate application.

14. The applicant is to comply with all requirements of the Hunter Water Corporation regarding the connection of water supply and sewerage services, including the payment of any required cash contribution towards necessary amplification of service mains in the locality as a result of the increased intensity of land use proposed. A copy of the Corporation’s compliance certificate (refer s50 Hunter Water Act 1991) is to be included in documentation for a Construction Certificate application.

15. Erosion and sediment control measures are to be implemented prior to the commencement of works and be maintained during the period of construction in accordance with the details set out on an Erosion and Sediment Control Plan that is to be submitted for approval with the Construction Certificate application. Controls are not to be removed until the site is stable with all bare areas supporting an established vegetative cover.
16. The Developer designing and constructing the following works in connection with the development, at no cost to Council and in accordance with Council’s guidelines and design specifications:

a) Extension of Perth Road through to the eastern road boundary of the unformed Bavin Road, such comprising road pavement, kerb and gutter, drainage, vehicular barrier fencing, street lighting and signage

b) Provision of a 6.0m wide sealed access road from the proposed Perth Road extension to the proposed 28 space car park entry/exit, such comprising road pavement, vehicular barrier fencing, street lighting, signage and line marking

c) Installation of bollards and/or fencing along both sides of Bavin Road full length with associated regulatory signage to prevent parking and street lighting

d) Concrete pedestrian pathway and pedestrian crossing facility in Perth Road linking the development site to existing footway paving located on the western side of Bavin Road at Lambton Road.

Engineering design plans and specifications for the works being undertaken within the public road reserve are required to be prepared by a suitably qualified practising civil engineer with experience and competence in the related field and submitted to Council for approval pursuant to Section 138 of the Roads Act 1993 (NSW). The consent must be obtained, or other satisfactory arrangements confirmed in writing from Council, before the issue of a Construction Certificate.

17. A separate application must be lodged and consent obtained from Council for all works within the road reserve pursuant to Section 138 of the Roads Act 1993 (NSW), before the issue of a Construction Certificate. The consent must be obtained, or other satisfactory arrangements confirmed in writing from Council, before the issue of a Construction Certificate.

18. The design and construction of the development is to be in accordance with the relevant requirements of Australian Standard 4674:2004 - Design, Construction and Fit-Out of Food Premises. Full details are to be included in the documentation for the Construction Certificate application.

18A. The applicant must prepare a Plan of Management, to the satisfaction of the Council, for the operation of the proposed development which addresses the following:

a) The management of all activities associated with the facility so that they can co-exist with the approved activities of the helicopter base immediately to the north of the site (Helicopter Base);

b) The management of the car park to the north of the proposed Centre of Excellence building so it is only occupied by staff of the facility (who must be inducted and briefed on protection from downwash during helicopter operations associated with the Helicopter Base);

c) Require the applicant to ensure all people are moved off the fields and away from helicopter activity to protect them from downwash after a notification procedure between the Helicopter Base and the proposed development;

d) The erection of appropriate signage by the Rescue Helicopter Service around the precinct warning of helicopter activity including along the pathways on the western side of the storm water drain;
e) The establishment of hedges around the western side of the northern car park and the southern boundary of the Helicopter Operations Area.

f) Providing the operator of the Helicopter Base with use of the ‘Helicopter Operations Area’ according to the Plan of Management identified on the approved plans while ever the Helicopter Base remains used for that purpose.

Prior to approval the Council must provide a copy of the Plan of Management to the operator of the Helicopter Base and provide the operator with at least 7 days to make any submission. The Council must consider any submission made within that time by the operator prior to approval of the Plan of Management.

**CONDITIONS TO BE SATISFIED PRIOR TO THE COMMENCEMENT OF WORK AND DURING THE CONSTRUCTION PHASE**

19. Building demolition is to be planned and carried out in accordance with Australian Standard 2601:2001 - The Demolition of Structures.

20. Tree removal and retention shall be carried out in accordance with the Arborist Report prepared by Terras dated 22 May 2017.

21. All recommendations contained within the Statement of Heritage Impact prepared by EJE Heritage dated May 2019 are to be complied with.

22. The demolisher is to ensure that all services (ie water, telecommunications, gas, electricity, sewerage etc), are disconnected in accordance with the relevant authority’s requirements prior to demolition.

23. Any waste containers used in association with the proposed demolition are to be located on the site where possible.

   Note: Where this is not feasible, application must be made for Council’s approval to position the container on the adjacent public road in accordance with Council’s adopted Building Waste Container Policy.

24. The demolisher is to ensure that all demolition material is kept clear of the public footway and carriageway as well as adjoining premises.

25. Waste management shall be implemented in accordance with the approved Waste Management Plan. At a minimum, the following measures shall be implemented during the construction phase:

   a) A waste container of at least one cubic metre capacity shall be provided, maintained and regularly serviced from the commencement of operations until the completion of the building for the reception and storage of waste generated by the construction of the building and associated waste

   b) The waste container is to be, at minimum, constructed with a ‘star’ picket (corners) and weed control mat (sides), or equivalent. The matting is to be securely tied to the pickets

   c) Appropriate provision is to be made to prevent windblown rubbish leaving the site and

   d) Footpaths, road reserves and public reserves are to be maintained clear of rubbish, building materials and all other items.

   Note: Fines may be issued for pollution/littering offences under the Protection of the Environment Operations Act 1997 (NSW).
26. If construction / demolition work is likely to cause pedestrian or vehicular traffic in a public place to be obstructed or rendered inconvenient, or involves the need to enclose a public place, a hoarding or fence must be erected between the work site and the public place. If necessary, an awning is to be erected, sufficient to prevent any substance from, or in connection with, the work falling into the public place. Any such hoarding, fence or awning is to be removed when the work has been completed.

27. An application is to be made to and approved by Council for the erection of a hoarding or part closure of the footway prior to construction being commenced. Such overhead structure or protective fence shall comply with the *Work Health and Safety Act 2011* (NSW), *Work Health and Safety Regulation 2011* (NSW) and any relevant approved industry code of practice. Notice of intention of commencement must be given to WorkCover New South Wales.

28. The work site must be kept lit between sunset and sunrise if it is likely to be hazardous to persons in the public place.

29. A rigid and durable sign is to be erected on any site on which building work, subdivision work or demolition work is being carried out, before the commencement of the work:
   a) showing the name, address and telephone number of the Principal Certifying Authority for building work and subdivision work, and
   b) showing the name, address and telephone number of the Principal Contractor for any building work and also including a telephone number on which the Principal Contractor may be contacted at any time for business purposes, and
   c) stating that unauthorised entry to the work site is prohibited, and
   d) being erected in a prominent position that can be read easily by anyone in any public road or other public place adjacent to the site.

Any such sign is to be maintained while the building work, subdivision work or demolition work is being carried out, but must be removed when the work has been completed.

30. All building work must be carried out in accordance with the provisions of the National Construction Code.

31. All excavations and backfilling are to be executed safely in accordance with appropriate professional standards and excavations are to be properly guarded and protected to prevent them from being dangerous to life and property.

32. All building materials, plant and equipment is to be placed on the site of the development so as to ensure that pedestrian and vehicular access in public places is not restricted and to prevent damage to the road reserve. The storage of building materials on Council reserves including the road reserve is not permitted.

33. Prior to commencement of site works the developer is to submit to Council for approval a Construction Traffic Management Plan addressing traffic control measures to be utilised in the public road reserve during the construction phase.

34. The Construction Traffic Management Plan is to be prepared by a Roads & Maritime Services accredited person with a Design and Audit Traffic Control Plans Certificate in accordance with Australian Standard 1742.3:2009 - Manual of uniform traffic devices - traffic control for works on roads. The plan is to ensure the provision for safe, continuous movement of traffic and pedestrians within the road reserve.

35. Any alteration to natural surface levels on the site is to be undertaken in such a manner as to ensure that there is no increase in surface water runoff to adjoining properties or that runoff is impounded on adjoining properties, as a result of the development.
36. Construction/demolition work that generates noise that is audible at residential premises is to be restricted to the following times:

- Monday to Friday, 7:00 am to 6:00 pm and
- Saturday, 8:00 am to 1:00 pm.

No noise from construction/demolition work is to be generated on Sundays or public holidays.

37. Council’s ‘Prevent Pollution’ sign is to be erected and maintained in a conspicuous location on or adjacent to the property boundary so it is clearly visible to the public or at other locations on the site as otherwise directed by Council for the duration of demolition and construction work.

38. Any fill material imported into the site is to be Virgin Excavated Natural Material or material subject to a Resource Recovery Order that is permitted to be used as a fill material under the conditions of the associated Resource Recovery Exemption, in accordance with the provisions of the Protection of the Environment Operations Act 1997 and the Protection of the Environment (Waste) Regulation 2014.

39. Documentation demonstrating the compliance with the conditions of the appropriate Resource Recovery Order and Resource Recovery Exemption must be maintained for any material received at the site and subsequently applied to land under the conditions of the Resource Recovery Order and Exemption. This documentation must be provided to Council officers or the Principal Certifying Authority on request.

40. Erosion and sediment control measures are to be implemented prior to the commencement of works and maintained during the period of demolition and/or construction in accordance with the requirements of Managing Urban Stormwater: Soils and Construction 4th Edition - Vol. 1 (the ‘Blue Book’) published by Landcom, 2004. Controls are not to be removed until the site is stable with all bare areas supporting an established vegetative cover.

41. Prior to the commencement of work, a 3m wide all weather vehicle access is to be provided from the kerb and gutter to the building under construction, to reduce the potential for soil erosion. Sand shall not be stockpiled on the all weather vehicle access.

42. All necessary measures are to be undertaken to control dust pollution from the site. These measures must include, but not are limited to:

a) Restricting topsoil removal

b) Regularly and lightly watering dust prone areas (note: prevent excess watering as it can cause damage and erosion

c) Alter or cease construction work during periods of high wind and

d) Erect green or black shadecloth mesh or similar products 1.8m high around the perimeter of the site and around every level of the building under construction.

43. The development being carried out in accordance with the details set out in the Acid Sulfate Soil Management Plan prepared by Douglas Partners dated May 2019.

44. A construction and environmental management plan (CEMP) shall be prepared by the contractor which outlines procedures for soil handling, segregation and is to include an unexpected finds protocol in accordance with the recommendations of the Targeted Detailed Site Investigation for Contamination, prepared by Douglas Partners Pty Ltd, December 2018. The CEMP shall be implemented for the duration of remediation and construction works as required.
CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF AN OCCUPATION CERTIFICATE, A SUBDIVISION CERTIFICATE OR A STRATA CERTIFICATE

45. All public footways, footpaving, kerbs, gutters and road pavement damaged during the works are to be immediately repaired following the damage, to a satisfactory state that provides for safe use by pedestrians and vehicles. Full restoration of the damage is to be carried out to Council’s satisfaction prior to the completion of demolition work or prior to the issue of any occupation certificate in respect of development involving building work.

46. All works within the road reserve required by this consent for each stage are to be completed prior to the issue of any Occupation Certificate for each stage.

47. Any redundant existing vehicular crossing is to be removed at no cost to Council. The road reserve and kerb being restored to, Council’s satisfaction, to match the existing infrastructure. Works are to be completed prior to the issuing of a Final Occupation Certificate for the development.

48. A copy of the stormwater drainage design plans approved with the Construction Certificate with ‘work as executed’ levels indicated, shall be submitted to the Principal Certifying Authority and to The City of Newcastle prior to the issue of an Occupation Certificate. The plans shall be prepared by a Practising Professional Engineer or Registered Surveyor experienced in the design of stormwater drainage systems.

49. A Landscape Practical Completion Report is to be submitted to the Principal Certifying Authority prior to the issue of the Final Occupation Certificate of stage 1. The report is to verify that all landscape works have been carried out in accordance with the comprehensive landscape design plan and specifications that were required to be included in documentation for a Construction Certificate application and is to verify that an effective maintenance program has been commenced.

50. Prior to issue of an Occupation Certificate for stage 1, the food business must notify the relevant enforcement agencies, under the Food Act 2003 (NSW) and (for licensed food businesses) under the Food Regulation 2010 (NSW). Notification is to be provided to Council and the NSW Food Authority.

Note: To arrange notification of the food business with Council go to www.newcastle.gov.au and download a copy of the ‘Council Food Business Notification Form’ or contact Council’s Environmental Health Services on (02) 4974 2525. To notify with the NSW Food Authority go to www.foodnotify.nsw.gov.au and follow the instructions.

CONDITIONS TO BE SATISFIED DURING THE OPERATION AND USE THE DEVELOPMENT

51. Waste management (recyclable and non-recyclable) is to be collected from the refuse storage areas, as identified on the approved plans, serviced from Bavin Road and returned immediately to the refuse storage areas. Under no circumstances are garbage bins to be presented to Bavin Road for kerbside collection or remain at kerbside after collection. Clear thoroughfare must be maintained at all times along Bavin Road.

52. The hours of operation of the premises are to be not more than from:

<table>
<thead>
<tr>
<th>DAY</th>
<th>START</th>
<th>FINISH</th>
</tr>
</thead>
<tbody>
<tr>
<td>Monday</td>
<td>6:00am</td>
<td>10:00pm</td>
</tr>
<tr>
<td>Tuesday</td>
<td>6:00am</td>
<td>10:00pm</td>
</tr>
<tr>
<td>Wednesday</td>
<td>6:00am</td>
<td>10:00pm</td>
</tr>
</tbody>
</table>
unless a separate application to vary the hours of operation or trading has been submitted to and approved by Council.

53. The use and occupation of the premises, including all plant and equipment installed thereon, is not to give rise to any offensive noise, as defined under the *Protection of the Environment Operations Act 1997* (NSW).

Should Council consider offensive noise has emanated from the premises, the owner/occupier of the premises will be required to submit an acoustic assessment prepared by a suitably qualified acoustical consultant recommending appropriate acoustic measures necessary to ensure future compliance with this condition and will be required to implement such measures within a nominated period. Furthermore, written certification from the said consultant confirming the recommended acoustic measures have been satisfactorily implemented will be required to be submitted to Council prior to the expiration of the nominated period.

54. The use and occupation of the premises is not to give rise to the emission of any 'air impurity' as defined under the *Protection of the Environment Operations Act 1997* (NSW), that interferes unreasonably with the amenity of neighbouring premises and/or other sensitive receivers.

Should Council consider that unreasonable levels of air impurities have been emitted from the premises, the owner/occupier will be required to engage a suitably qualified consultant to recommend measures to control emissions of air impurities to an acceptable level and such measures being implemented within a nominated time period. Furthermore, written certification from the suitably qualified consultant will be required to be submitted to Council confirming that air impurity emissions from the premises do not interfere unreasonably with the amenity of neighbouring premises and/or other sensitive receptors before the expiration of the nominated period.

55. The use and occupation of the proposed development the subject of this consent on the subject land (Lot 3284, DP 1049501) must comply with the Plan of Management approved under condition 18A of this consent.

**ADVISORY MATTERS**

- It is recommended that, prior to commencement of work, the free national community service 'Dial before you Dig' be contacted on 1100 or by fax on 1200 652 077 regarding the location of underground services in order to prevent injury, personal liability and even death. Inquiries should provide the property details and the nearest cross street/road.

- Any necessary alterations to public utility installations are to be at the developer/demolisher’s expense and to the requirements of both Council and any other relevant authorities. Council and other service authorities should be contacted for specific requirements prior to the commencement of any works.

- Prior to commencing any building works, the following provisions of Division 6.2 of the *Environmental Planning and Assessment Act 1979* are to be complied with:
  
a) A Construction Certificate is to be obtained; and
  
b) A Principal Certifier is to be appointed for the building works and Council is to be notified of the appointment; and
c) Council is to be given at least two days notice of the date intended for commencement of building works.

- Prior to the occupation or use of a new building, or occupation or use of an altered portion of, or an extension to an existing building, an Occupation Certificate is to be obtained from the Principal Certifying Authority appointed for the development. An application for an Occupation Certificate must contain the information set out in Clause 149 of the *Environmental Planning and Assessment Regulation 2000* (NSW).

- A copy of the final Fire Safety Certificate (together with a copy of the current fire safety schedule) is to be given to the Commissioner of NSW Fire Brigades and a further copy of the Certificate (together with a copy of the current fire safety schedule) is to be prominently displayed in the building.

- An annual Fire Safety Statement in the form described in Clause 175 of the *Environmental Planning and Assessment Regulation 2000* (NSW) is to be submitted to Council and a copy (together with a copy of the current fire safety schedule) is to be given to the Commissioner of New South Wales Fire Brigades. A further copy of the Statement (together with a copy of the current fire safety schedule) is to be prominently displayed in the building.

- It is an offence under the provisions of the *Protection of the Environment Operations Act 1997* (NSW) to act in a manner causing, or likely to cause, harm to the environment. Anyone allowing material to enter a waterway or leaving material where it can be washed off-site may be subject to a penalty infringement notice (‘on-the-spot fine’) or prosecution.

- Failure to comply with the conditions of consent constitutes a breach of the *Environmental Planning and Assessment Act 1979* (NSW), which may be subject to a penalty infringement notice (‘on-the-spot fine’) or prosecution.

- For the purpose of applying the provisions of the National Construction Code for class 1, 2, 3, 4, 9a (health care) and 9c (aged care) buildings, it is advised that the proposed building is located in a Flood Hazard Area and the:
  
a) Defined Flood Level (DFL) is 7.5m Australian Height Datum (AHD)
  b) Flood Hazard Level is 8.0m AHD (Freeboard is 500mm above DFL)
  c) Maximum Flow Velocity of floodwaters for the Defined Flood Event is 0.3m/s

**END OF CONDITIONS**
SCHEDULE 2

REASONS FOR THE DETERMINATION & CONSIDERATION OF COMMUNITY VIEWS
The determination decision was reached for the following reasons:

• The proposed development, subject to the recommended conditions, is consistent with the objectives of the applicable environmental planning instruments, being; *Newcastle Local Environmental Plan 2012* (NLEP) and applicable State Environmental Planning Policies.

• The proposed development is, subject to the recommended conditions, consistent with the objectives of the *Newcastle Development Control Plan 2012* (NDCP).

• The proposed development is considered to be of an appropriate scale and form for the site and the character of the locality.

• The proposed development has appropriate management and mitigation of impacts through conditions of consent.

• The proposed development, subject to the recommended conditions, will not result in unacceptable adverse impacts upon the natural or built environments.

• The proposed development is a suitable and planned use of the site and its approval is within the public interest.

REASONS WHY THE CONDITIONS HAVE BEEN IMPOSED
The following conditions are applied to:

• Confirm and clarify the terms of Council's determination;

• Identify modifications and additional requirements that will result in improved compliance, development and environmental outcomes;

• Prevent, minimise, and/or offset adverse environmental impacts including economic and social impacts;

• Set standards and measures for acceptable environmental performance; and

• Provide for the ongoing management of the development.
DAC 10/12/19

DA2019/00588 - 6 BAVIN ROAD BROADMEADOW

Item 23 - Attachment C: Updated Processing Chronology
THE CITY OF NEWCASTLE
Supplementary Report to Development Applications Committee
Meeting on 10 December 2019

PROCESSING CHRONOLOGY

DA2019/00588

21 March 2019  Pre-Development Application meeting
27 May 2019    Development application submitted
11 June – 27 June 2019  Public notification
9 July 2019    Meeting to discuss traffic and engineering issues.
30 July 2019   Submission from Westpac Rescue Helicopter Service received
6 November 2019 Amended Plans and formal response to matters raised Westpac Rescue Helicopter Service’s submission.
3 December 2019 Following a Land and Environment Court order on 3 December 2019, restraining the determination of the application, Council invited a further submission from the Service in relation to the amended application. A further submission was received on 10 December 2019 from the Service reiterating previously held concerns regarding the potential impacts to the Service’s operations.
