Councillors,

In accordance with section 367 of the Local Government Act, 1993 notice is hereby given that a Public Voice Committee will be held on:

**DATE:** Tuesday 8 October 2019  
**TIME:** 5.30pm  
**VENUE:** Council Chambers  
2nd Floor  
City Hall  
290 King Street  
Newcastle NSW 2300

J Bath  
Chief Executive Officer  
City Administration Centre  
282 King Street  
NEWCASTLE NSW 2300

Tuesday 1 October 2019

*Please note:*

Meetings of City of Newcastle (CN) are webcast. CN accepts no liability for any defamatory, discriminatory or offensive remarks or gestures made during the meeting. Opinions expressed or statements made by participants are the opinions or statements of those individuals and do not imply any form of endorsement by the CN. Confidential meetings will not be webcast.

The electronic transmission is protected by copyright and owned by CN. No part may be copied or recorded or made available to others without the prior written consent of CN. Council may be required to disclose recordings where we are compelled to do so by court order, warrant or subpoena or under any legislation. Only the official minutes constitute an official record of the meeting.

Authorised media representatives are permitted to record meetings provided written notice has been lodged. A person may be expelled from a meeting for recording without notice. Recordings may only be used for the purpose of accuracy of reporting and are not for broadcast, or to be shared publicly. No recordings of any private third party conversations or comments of anyone within the Chamber are permitted.

PUBLIC VOICE SESSIONS

ITEM-1 PV 08/10/19 - DA2017/00789 - 9 BELFORD STREET, BROADMEADOW - ALTERATIONS TO BUILDING FOR CHANGE OF USE TO DWELLING, ERECTION OF FIVE THREE STOREY ATTACHED DWELLINGS, ASSOCIATED SITE WORKS AND ONE LOT INTO SIX LOT SUBDIVISION

APPLICANT: SNL Building Constructions P/L
OWNER: STOCKTON STREET PTY LTD
REPORT BY: GOVERNANCE
CONTACT: DIRECTOR GOVERNANCE/ MANAGER REGULATORY, PLANNING AND ASSESSMENT

BACKGROUND

An application has been received seeking consent for alterations to the former Hamilton Fire Station for a change of use to a dwelling, erection of five attached three-storey dwellings, tree removal and subdivision of the land into six lots.

The original proposal sought approval for six attached three-storey dwellings (fronting Dixon Street) and was notified to neighbouring properties on 15 June 2017 in accordance with City of Newcastle’s (CN) public participation policy. A total of 59 submissions objecting to the proposal were received, including three Public Voice requests.

The proposal was amended by deleting a dwelling and the amended plans were re-notified. The amended proposal generated 93 submissions objecting to the proposal, including three Public Voice requests. The main categories of objection include:

i. Overall design (height, bulk and scale)
ii. Number of new dwellings
iii. Heritage impacts
iv. Amenity impacts to neighbouring properties
v. Traffic / parking impacts
vi. Safety issues
In response to concerns raised by CN officers, a contamination assessment was undertaken, which identified levels of PFAS contamination at the site. As a result, the site required remediation to render it suitable for residential use. The application has been amended to include remediation as part of the proposed scope of works and was re-notified to all previous submitters. Five further submissions were received in response to that process.

The application will be referred to the Development Applications Committee for determination, due to the number of public submissions received, in addition to the application being called in by two Councillors.

A copy of the amended plans for the proposed development is appended at Attachment A.

1.0 THE SITE

The subject site is located at 9 Belford Street Broadmeadow (Lot 1 DP 77912) and has an area of 911.8m².

The site has road frontages to Belford Street (north), Samdon Street (west) and Dixon Street (south). The land slopes upward from Belford Street toward Dixon Street.

The site contains the former Hamilton Fire Station and is listed as a local heritage item. The site is not within a Heritage Conservation Area, however it is located in the vicinity of other local heritage items, including St. Peters Anglican Church and Hamilton Public School.

2.0 THE PROPOSAL

The proposal has been amended in response to concerns raised by CN officers and in public submissions.

The application currently seeks consent for:

1. Alterations to the former Hamilton Fire Station and change of use to a dwelling
2. Erection of five attached, three-storey dwellings (accessed from Dixon Street)
3. Tree removal
4. Torrens Title subdivision of one lot into six lots

The proposed new dwellings have driveway entrances from Dixon Street. Existing vehicular access to the former fire station building is to be retained from Belford Street.

A copy of the submitted plans is appended at Attachment A. The various steps in the processing of the application to date are outlined in the Processing Chronology included at Attachment B.
3.0 PUBLIC NOTIFICATION

The application was publicly notified in accordance with CN's public participation policy on three separate occasions.

The concerns raised by the objectors in respect of the proposed development (as amended) are summarised as follows:

1) Statutory and Policy Issues
   i. Density - excessive number of dwellings resulting in an overdevelopment of the site.
   ii. Building height - building height is not compatible with the residential context of the neighbourhood which largely consists of one-storey and two-storey dwellings.
   iii. Land zoning - the site is zoned R4 High Density Residential. This is an inappropriate classification for this site.

2) Amenity Issues
   i. Overshadowing - additional overshadowing on Dixon Street.
   ii. Privacy - overlooking of properties located opposite in Dixon Street.
   iii. View loss - obstruction of views and loss of outlook to neighbouring properties.
   iv. Landscaping and open space - lack of open space and landscaping provided within the development; loss of trees and limited opportunity for compensatory planting.

3) Design and Aesthetic Issues
   i. Bulk and scale - scale and massing is unsympathetic with the streetscape and existing heritage building.
   ii. Visual impact - visual dominance of western wall facing Samdon Street.
   iii. Heritage impacts - proposed development will have an adverse impact on the heritage value of the Fire Station building.

4) Traffic and Infrastructure Issues
   i. Traffic - increased traffic movements; Dixon Street is a residential cul-de-sac with a primary school at one end.
   ii. Parking - increased pressure for on street parking; there is not enough parking for future residents with three bedrooms and only single garages provided for each dwelling.
   iii. Pedestrian safety - five additional driveways are proposed on a heavily trafficked footpath used by primary school children, parents with prams and people using wheelchairs.
   iv. Stormwater and sewerage - increased pressure on existing infrastructure.
5) Miscellaneous

i. Construction impacts - concern regarding the impacts on neighbours arising from the construction process.

ii. Property Values - the proposal will result in devaluation of surrounding properties.

iii. Public interest - there is no public benefit afforded to the community.

4.0 DEVELOPMENT OFFICER PLANNING ASSESSMENT

The submitted application has been assigned to Senior Development Officer, William Toose, for assessment.

The site is located in the R4 High Density Residential zone within which the development is permissible with development consent as ‘multi-dwelling housing’.

The former Hamilton Fire Station is identified for its 'local' heritage significance in Newcastle Local Environmental Plan 2012 (NLEP 2012). A Heritage Impact Statement submitted with the application concludes that the proposed development will have negligible impact on the heritage significance of the site and nearby listed items.

Two off-street parking spaces are provided per dwelling, which exceeds the numerical requirements of Newcastle Development Control Plan 2012 (NDCP 2012), and a further two on-street parking spaces have been retained between the three proposed driveways in Dixon Street.

The proposed development does not comply with the floor space ratio (FSR) development standard of 0.9:1 under NLEP 2012. The proposed development has an FSR of 0.98:1, which equates to an 8.5% variation to the FSR development standard.

The proposed development complies with the height of buildings development standard of 11m under NLEP 2012.

The site is contaminated as a result of its former use as a Fire Station. The application was referred to the NSW EPA, to seek guidance and comment to inform CN’s assessment of the contamination of the site. The remediation strategy was amended in consequence with the advice received from NSW EPA and CN’s Senior Environmental Protection Officer.

The above issues along with issues raised in submissions will be addressed in an assessment report to the Development Applications Committee.

ITEM-2 PV 08/10/19 - DA 2018/00693 - 90-92 BRUNKER ROAD, BROADMEADOW - DEMOLITION OF EXISTING DWELLINGS AND OUTBUILDINGS, ERECTION OF FOUR STOREY MIXED USE DEVELOPMENT AND 16 LOT STRATA SUBDIVISION

APPLICANT: LAURANGEL PTY LTD
OWNER: LAURANGEL PTY LTD
REPORT BY: GOVERNANCE
CONTACT: DIRECTOR GOVERNANCE / MANAGER REGULATORY, PLANNING AND ASSESSMENT

BACKGROUND

An application has been received seeking consent for the demolition of two dwellings and outbuildings, erection of a four-storey mixed use development and a sixteen lot strata subdivision.

A copy of the submitted plans for the proposed development is attached at Attachment A.

The application will be referred to the Development Applications Committee for determination, due to the application being called in by two Councillors.

The proposed development was publicly notified in accordance with City of Newcastle’s (CN’s) public participation policy and four submissions have been received in response. Three of the submissions object to the proposal and one is in support of the proposal.

The objectors’ concerns included:

i) Character / Visual Appearance
ii) Overdevelopment
iii) Building Setbacks
iv) Overshadowing Impacts
v) Privacy Impacts
vi) Acoustic Impacts
vii) Parking
viii) Traffic Impacts
ix) Drainage Impacts
1.0 THE SITE

The subject property comprises of Lots A & B DP 368412, 90-92 Brunker Road Broadmeadow and is rectangular in shape with a combined area of 964m². The site is located on the north-western side of Brunker Road, near the intersection with Melville Road.

The consolidated site has a frontage of 20.1m to Brunker Road and 20.08m to the unnamed lane at the rear.

The site is relatively flat, with a slight fall toward Brunker Road, and contains several small shrubs / trees. There is a single storey dwelling and associated outbuildings on each of the lots within the subject site.

Existing development on adjoining sites comprises of single storey dwellings. Opposite the subject site is a multi-dwelling housing site and Arthur Park, on the corner of Brunker Road and Melville Road.

The general form of development in the area consists of a broad mix of uses between single dwellings (single story and two-storey) and more recent mixed use apartment complexes similar to the current proposal. The newer mixed use apartments vary in size, typically being three to five storeys in height. There are also various commercial uses such as the building to the north-east, on the corner of Coolah Road and Brunker Road.

2.0 THE PROPOSAL

The applicant seeks consent for the demolition of dwellings and outbuildings, the erection of a four-storey mixed use development and a 16 lot strata subdivision. The ground floor consists of a commercial unit (50m²) at the Brunker Road frontage to be used as ‘business premises’ and car parking, involving 16 resident spaces, 3 visitor spaces and one commercial parking space. The 16 dwellings consist of four x one-bedroom and 12 x two-bedroom apartments, each with balconies. The proposed design involves two apartment towers (ie. levels 1-3), with one built towards Brunker Road and the other towards the rear lane and with a landscaped podium being proposed between the two towers at level one.

A copy of the current amended plans is appended at Attachment A.

The various steps in the processing of the application to date are outlined in the Processing Chronology (refer to Attachment B).
3.0 PUBLIC NOTIFICATION

The original application was publicly notified in accordance with CN’s public participation policy. Four submissions were received in response, with three of the submissions objecting to the proposal and one being in support. The concerns raised by the objectors in respect of the proposed development are summarised as follows:

i) **Character / visual appearance** – The proposal is inconsistent with the existing character of the area. The large proposal at four storeys will have a significant visual impact.

ii) **Overdevelopment** – The proposal is considered to be an overdevelopment of the site and will result in likely 32 residents plus a commercial tenancy, generating infrastructure and traffic impacts. The height and number of dwellings proposed should be reduced.

iii) **Building setbacks** – The proposal does not meet the setbacks under the Newcastle Development Control Plan 2012 (NDCP 2012) – Section 6.08.

iv) **Overshadowing impacts** – Concern that the proposal will result in unreasonable overshadowing impacts. The neighbouring dwelling and associated open space will each not receive two hours of solar access between 9am and 3pm on 21 June.

v) **Privacy impacts** – The position of the walkway within the development will result in unreasonable privacy impacts.

vi) **Acoustic impacts** – The relative position of the proposal to the neighbouring dwellings will result in unacceptable acoustic impacts from residents entering / exiting, use of intercom speakers and reflective traffic / rail noise.

vii) **Parking** – Concern that the proposal does not have sufficient parking and will result in overflow on-street parking, which is already overcrowded. The existing dwellings at 94, 96 and 98 Brunker Road, adjacent the site, already do not have any off-street parking.

viii) **Traffic impacts** – The proposal will further exacerbate traffic impacts in the area, especially in terms of the existing lane which is already increasingly busy. The laneway needs to be repaired and / or upgraded.

ix) **Drainage Impacts** – The development will result in increased drainage impacts on neighbouring properties.

x) **Waste management** – Concern that waste collection for the site will cause problems.
xi) **Thermal impacts** – The proposal will have an unreasonable impact as breezes to neighbouring properties will be restricted by the large scale of the proposal. Additionally, the large walls of the proposal will result in thermal mass heat loads unreasonably impacting the neighbouring properties.

xii) **Construction process** – Concern is raised how the proposed development will be constructed, having zero side setbacks, without impacting and damaging neighbouring properties, plus posing a safety concern for residents.

4.0 **DEVELOPMENT OFFICER PLANNING ASSESSMENT**

The submitted application has been assigned to Senior Development Officer, Damian Jaeger, for assessment.

The following comments are provided regarding key issues raised in submissions:

i) The proposal has been assessed by CN’s Urban Design Consultative Group and is considered to be acceptable. The proposed design is reflective of the adopted planning controls applicable under the Newcastle Local Environmental Plan 2012 (NLEP 2012) and Section 6.08 of the NDCP 2012 (ie. ‘Renewal Corridor controls’).

ii) The proposal complies with the floor space ratio development standard of 1.5:1, being proposed to be 1.19:1.

iii) Impact of proposal on the neighbouring property is predominately the same to that which would occur if a large two storey house was proposed, due to the relative size of each site (ie. 94 Brunker Road being relatively narrow).

iv) Opaque screens and additional landscaping on the podium level, addresses privacy impacts.

v) The proposal complies with the parking rate required under the NDCP 2012. The proposal is considered to be acceptable in terms of traffic impacts.

vi) A Waste Management Plan which has been provided involves general and recycling waste being collected directly from the site.
